# INDEX

A stylized, dark-toned illustration of a motorcycle, viewed from a side profile, serves as the background for the index page. The lines are sharp and angular, giving it a modern, graphic feel. The motorcycle is positioned diagonally across the frame, with the front wheel at the bottom left and the rear wheel towards the top right.

- ECE homologation 22-06 P/J

A close-up photograph of a black motorcycle fuel tank. The tank features large, stylized silver 'XTE6' lettering. Below the 'TE6' portion, the words 'TRAVEL EDITION' are printed in a smaller, sans-serif font, separated by a thin horizontal line. The background is a dark, glossy surface with some mechanical details visible in the upper right corner.

**XTE6**

**Hybrid leather technology is an innovative technology incorporating the best of both leather and textile materials.**

high abrasion  
resistant leather

lightweight  
material

**This amalgamation of highly abrasion resistant leather and tear strength properties of prudently selected textile results in the ultimate lightweight material, perfect for performance use. Compared to your normal leather garment this is much lighter, partially waterproof and offers great comfort.**

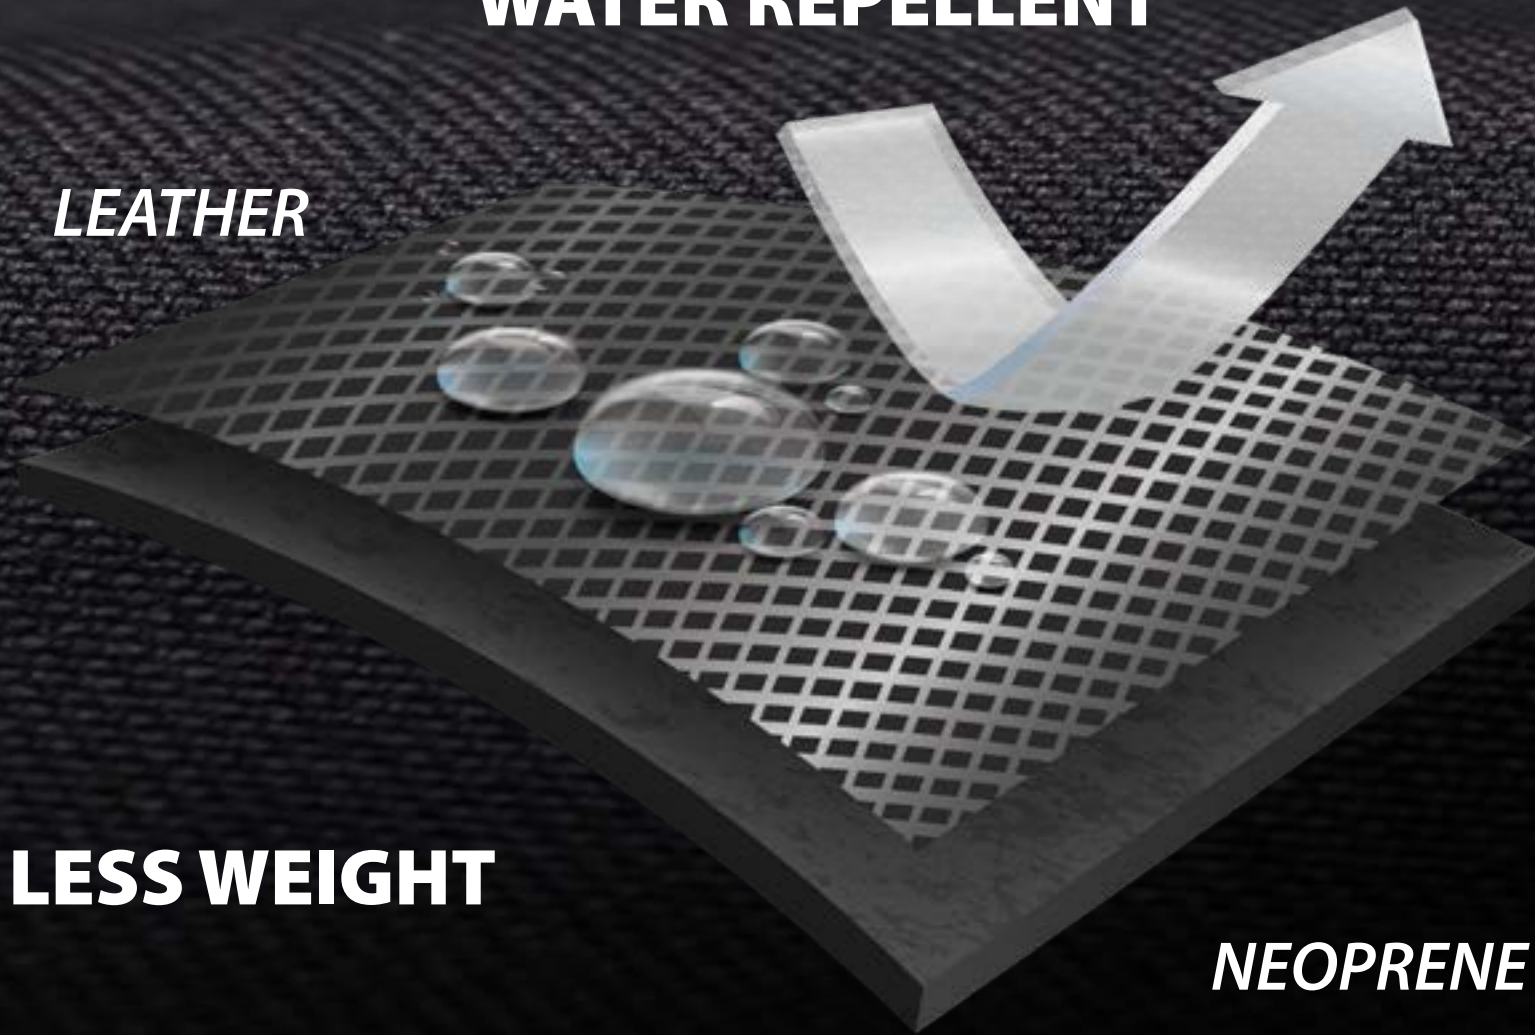

**Highly durable leather, known for its abrasion resistance and strength, is bonded with a layer of selected textile using a special lamination technique. This combination allows the use of significantly thinner leather, reducing the total weight of the suit by up to **40%**. At the same time, this fusion provides partial water resistance.**
